PROFILE

Software Engineer with a background in Software Engineering and Islamic Education. Over the past six months, I have focused intensively on learning and building real-world projects, gaining hands-on experience with technologies such as React, Next.js, Node.js, Golang, Python, and Flutter. Skilled in developing interactive frontends and integrated backends, with a proven ability to learn quickly, adapt to new challenges, and solve problems independently.

PROJECTS

- OrderIt – React + Vite + TypeScript, Bootstrap (Frontend) | Node.js + Express.js, MySQL (Backend)
Developed a full-stack ordering application featuring Google OAuth authentication, email verification, password recovery, responsive UI, and an analytics dashboard with filtering charts by day, month, and selected outlet.
- Web3 Landing Page – Next.js Designed and developed a futuristic DeFi landing page with gradient styling and modern UI components.
- Portfolio Website – Next.js + API AI Integration Created an interactive portfolio integrated with an AI assistant to explain projects dynamically.
- TictacBim – Python, ttkbootstrap Developed a Tic-Tac-Toe game with a polished UI, loading screen, and menu navigation.
- Flutter Login & Register – Materialize Styling Implemented mobile app screens with a clean and user-friendly design.

For more projects you can see in my [Portfolio](#) and [Github](#)
